DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13, drawn to apparatus for transporting and storing bills, and detecting amount of bills classified in class 271, subclass 3.01.
- II. Claims 14-17, drawn to apparatus for judging, temporarily storing bills, and calculating amounts of bills, classified in class 271, subclass 279.
- III. Claims 18-20, drawn to method for operating a bill handling device, classified in class 109, subclass 24.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as pushing with plates. Invention II has separate utility such as judging bills. See MPEP § 806.05(d).

Inventions III and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP §

Art Unit: 3653

806.05(e)). In this case invention III can be performed without pushing plates.

Invention I could store bills and detect the amount without undergoing a comparison.

Inventions III and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP §

806.05(e)). In this case invention III can be performed without pushing plates.

Invention II could be operated without confirming a door to be closed.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group III is not required for Group I, the search required for Group II is not required for Group I, and the search required for Group I is not required for the search of Groups II and III, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel K Schlak whose telephone number is 703-305-0885. The examiner can normally be reached on Mon-Thurs.
